SUMMARY

I specialise in building scalable web apps and enhancing brand presence through digital branding, logo design, and social media optimisation. My day-to-day tech stack includes Laravel, Next.js, TypeScript and SQL. I start from scratch when developing websites and apps, making sure to create experiences that are clear, useful, secure, and easy to use. I feel at ease working on both the frontend and backend, ensuring that everything functions properly. I'm currently freelancing. Contact me if you need someone that's dependable, realistic, and not afraid to think outside the box.

I'm an Australian citizen and open to relocation for the right opportunity.

EDUCATION

The Odin Project

2022

Full Stack Extensive Course

Online

- My basic understanding of full-stack web development was shaped by the extensive, free, and open-source Odin Project platform. It emphasizes a project-based curriculum that uses practical experience to teach fundamental skills like HTML, CSS, JavaScript, and React. The curriculum places a strong emphasis on real-world application, helping students create projects while learning contemporary web development techniques. It is the perfect learning environment because of its helpful Discord community, which encourages cooperation and offers direction. The Odin Project helped me close the knowledge gap between theory and practice by giving me the means to begin working on personal projects and establishing the foundation for my future as a full-stack developer.

PROJECTS

ShorX | Laravel, React, Inertia, TailwindCSS, SQL, PHP

2024

<https://www.shrx.me/>

- ShorX is a powerful link shortening service that lets users quickly shorten URLs and create QR codes for simple sharing + tracking. ShorX is pronounced "Shor Ten," with X representing the Roman numeral for ten. ShorX is a modern front-end with server-side back-end capabilities built with Laravel, React, and Inertia.js.

AYWA Clothing | Laravel, NextJS, TypeScript, TailwindCSS, SQL, PHP

2024

<https://www.aywa2dawrld.com/>

- Created a cutting-edge, expandable e-commerce system for a customer. The platform offers user identification, Stripe-powered checkout, easy product browsing, and a secure admin dashboard to handle assets. With a clean design made in Adobe Illustrator and Figma, the solution prioritizes performance, accessibility, and scalability and is built with Next.js, TailwindCSS, and Laravel (API-first). The project was created to accommodate future expansion along with cutting-edge features and is hosted on Vercel / DigitalOcean and Laravel Forge.
- Note: Site isn't available to public yet. However, client has permitted me to show source code and live site in person.

CapBlitz | NextJS, TypeScript, TailwindCSS

2024

<https://www.capblitz.com/>

- CapBlitz is an intuitive typing test application designed to help users improve their typing speed and accuracy through engaging tests. Built with Next.js and Tailwind CSS, CapBlitz offers a sleek and responsive user interface that adjusts seamlessly across devices.

EXPERIENCE

Returns Coordinator / Home Clearance

Aug. 2024 – Dec. 2024

Winning Group

Kewdale, WA

- * Process and categorize returned items, manage anomalies, and ensure accurate inventory through regular cycle counts and disposals.
- * Optimize Returns department efficiency, reduce operating costs, and effectively manage labor and overtime.
- * Maintain accurate records and reporting, including damage reports, spreadsheets, and transportation preparations.
- * Foster positive internal and external relationships, manage communications, and support various operational needs.
